

CURRENT DROUGHT CONDITIONS

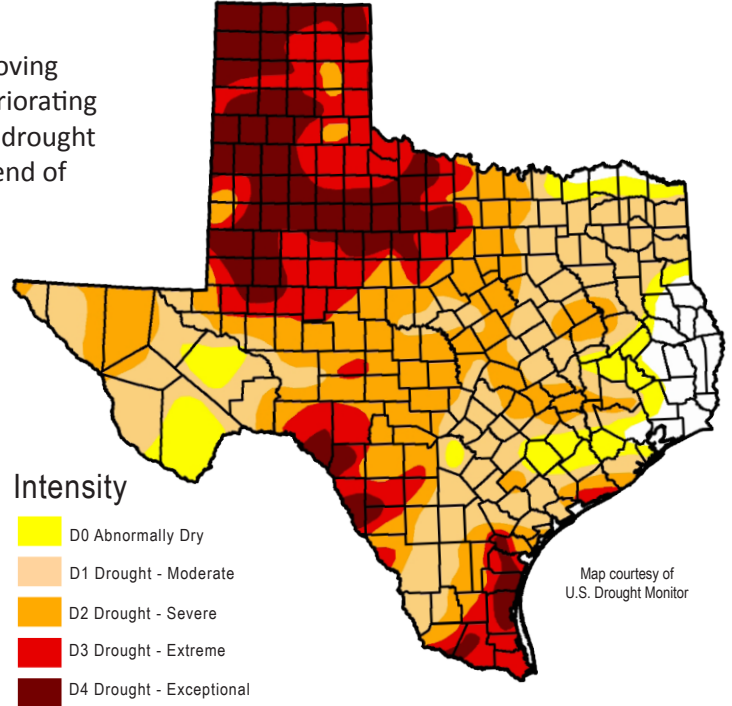

We continue to totter on the teeter-totter of drought: Improving conditions in the eastern half of the state (the teeter); deteriorating conditions in the western half (the totter). The most recent drought outlook predicts more teetering and tottering through the end of August.

Current drought statistics

- 95% of state currently in drought
- 97% a week ago
- 89% three months ago
- 97% a year ago

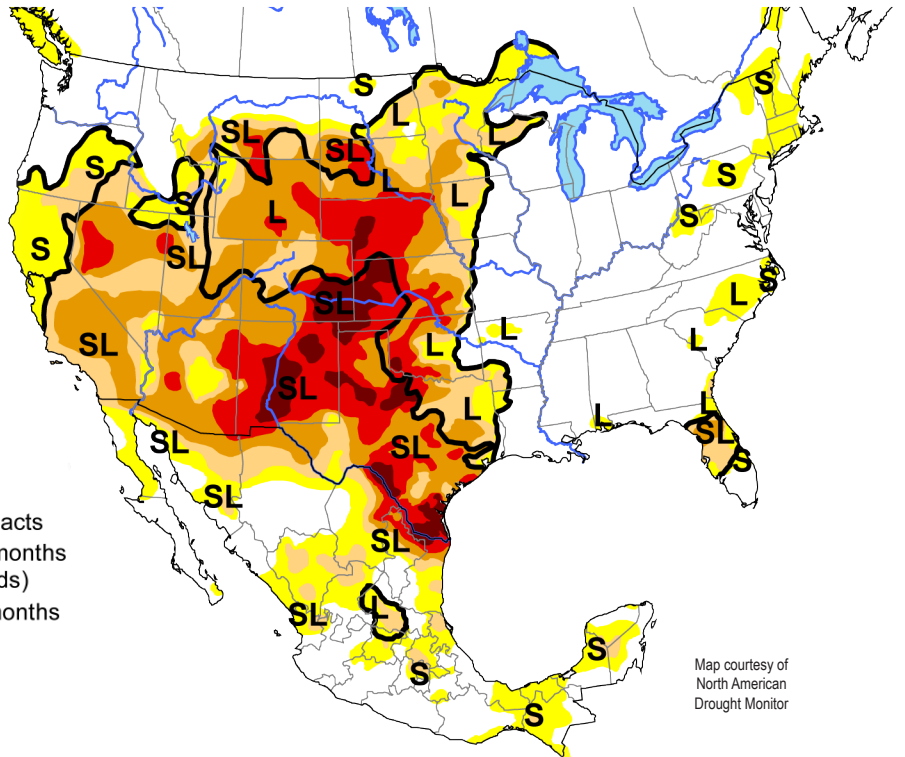

Statewide reservoir statistics

- Currently 67% full
- 66% a week ago
- 67% three months ago
- 77% a year ago
- Normally 85% at this time

A WIDER VIEW OF THE DROUGHT

Every once in a while we take a peek at the North American Drought Monitor to see what's happening in southern Colorado (the source of much of the water in Elephant Butte Reservoir which is used as a source for the El Paso area) and north-central Mexico (the source of much of the water in Lake Amistad and Lake Falcon which is a source for the lower Rio Grande Valley).
