

WATER CONDITIONS

Seems odd to be writing about drought after a perfect storm of storms developed over Texas this past weekend... The rains came at a good time since drought over the past week jumped to half the state, with an unhealthy uptick in exceptional drought. We expect to see drought fade in the coming weeks.

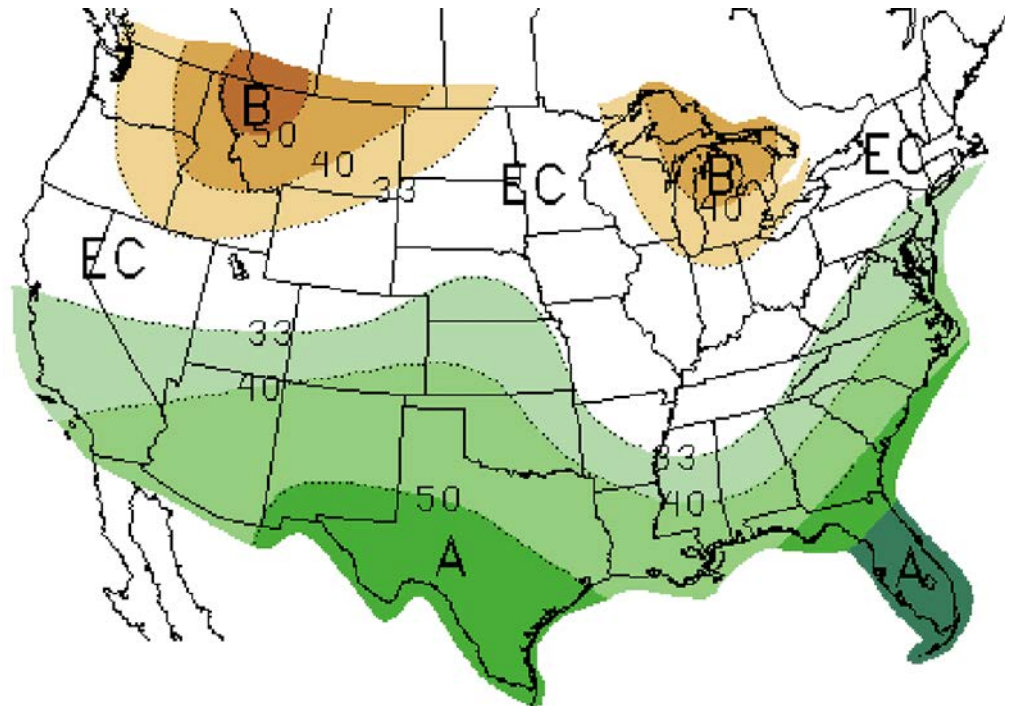

Drought conditions

- 50% now
- 47% a week ago
- 0% three months ago
- 49% a year ago

PRECIPITATION PROBABILITY

The National Weather Service is projecting wetter than normal conditions for Texas through January.

EC means equal chances for A, N, B
A means Above
N means Normal
B means Below
