

Water Weekly

For the week of 01/04/21

Water conditions

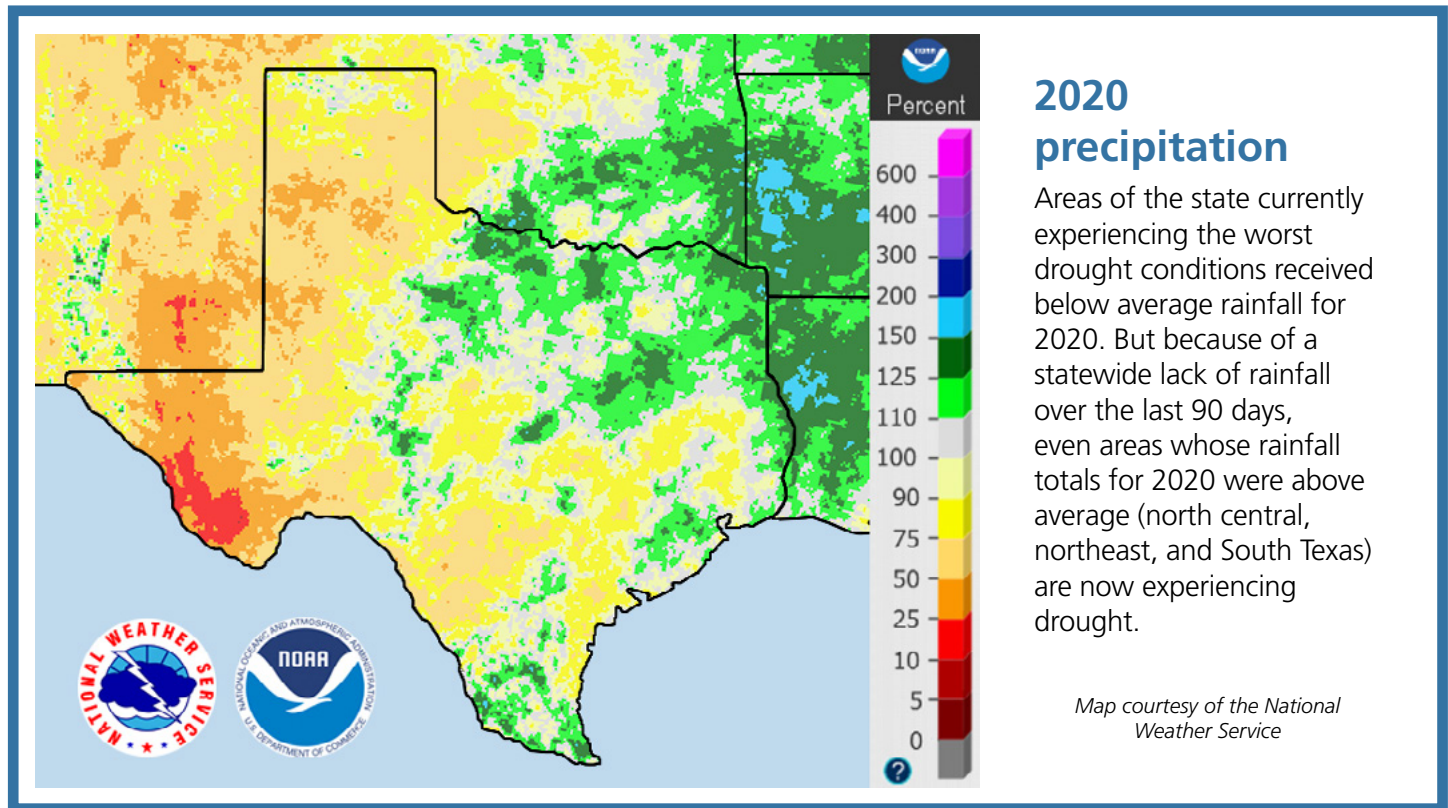

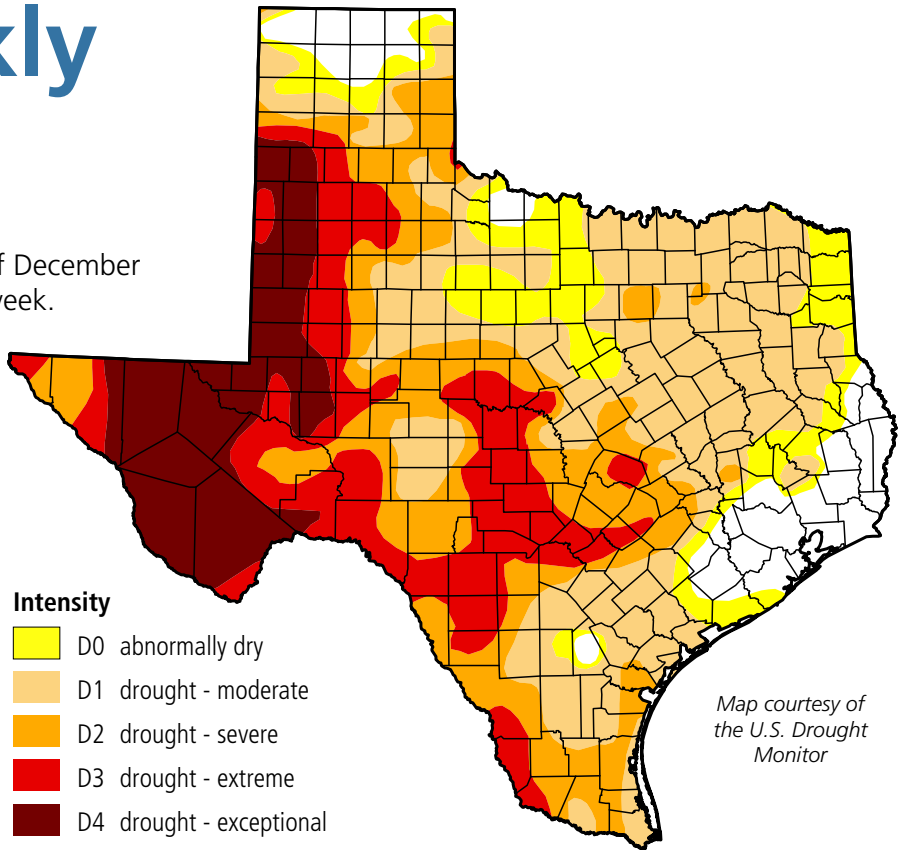

The latest drought map for conditions as of December 29 shows little change from the previous week.

However, storms on December 30 and 31 brought an inch or more of rainfall to large areas of Central and East Texas.

We can expect some improvements on next week's map.

Drought conditions

- ◆ 81% now
- ◆ 81% a week ago
- ◆ 32% three months ago
- ◆ 36% a year ago
